

## MULTI-STREAM RECYCLING CONTAINERS

The SRExP-90 outdoor recycling container series is made with rugged recycled plastics panels and beams for the structure.

Those are available in 2, 3 or 4-stream version. Each stream has a 90 liters – 23 US gallons plastic liner.

The front access and the sloped top are ideal for outside use by offering good weather protection. Each compartment has a same key lockable front door, stainless steel hinge and hardware for great durability.

Each compartment has its own label on its front door, clearly indentifying the service offered to the users. The label choice is: "WASTE", "RECYCLABLE", "CANS-BOTTLES" and "COMPOSTABLE".

Ergonomic conception: a lockable door at each compartment is given access to the 90 liters – 23 gallons plastic liner inside. By moving out the liner, it is easy to change the liner bag. Bag size is 28 x 38 in.

Each recycling SRExP-90 container is mounted with a stainless steel fixation plate at each corner.

You can personalise your recycling container by choosing within those colours. You can also mix 2 colours, one for the beams and one for the panels.

Model	Streams	Lenght	Depth	Height at front
SRE2P-90	2	77 cm - 30"	59 cm - 23"	123 cm - 48"
SRE3P-90	3	114 cm - 46"	59 cm - 23"	123 cm - 48"
SRE4P-90	4	151 cm - 60"	59 cm - 23"	123 cm - 48"
